

# EVERPURE® QC71 DIO-XCLM+/7SI SYSTEM

INTEGRATES FOUNTAIN AND ICE TREATMENT APPLICATIONS INTO A TWO-SYSTEM, SINGLE MANIFOLD CONFIGURATION

QC71 DIO Platform with XCLM+/7SI: EV9278-42  
XCLM+ Replacement Cartridge 1 PK: EV9761-00  
7SI Replacement Cartridge 1 PK: EV9606-01

## APPLICATIONS

Fountain  
Ice

Combination

## FEATURES • BENEFITS

Integrated header design incorporates two (2) independent systems into a single configuration providing two (2) distinct water qualities for multiple applications: primary filtration for fountain and secondary filtration with scale inhibitor for ice

Small system footprint is easy to install and service with built-in water shut-off and flushing valves on both water outlets

### XCLM+ System

Reduces chloramines, chlorine taste & odor and other offensive contaminants that can adversely affect the taste of beverages

Improves the taste of fountain beverages

Improved capacity filtration technology provides superior chlorine taste & odor reduction and micro-filters dirt and particles as small as 5 micron in size by mechanical means

Helps protect drink system seals, gaskets, pumps and tubes from chloramines damage

### 7SI System

Utilizes depth filtration and Fibredyne™ media for superior dirt-holding capacity

Effectively filters dirt and particles as small as 1/2-micron in size by mechanical means

NSF/ANSI Standard 53 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means

Reduces water-related ice machine problems caused by scale buildup from dirt and dissolved minerals\*

Reduces maintenance and service costs by reducing scale which can result in clogging of distribution lines, malfunction of probes, floats, pumps, solenoids and valves, and higher energy consumption

\* Not Performance Tested or Certified by NSF

## INSTALLATION TIPS

Connect minimum 1/2" (1.3 cm) water line.

Install vertically with cartridge hanging down.

Allow 2 1/2" (6.35 cm) clearance below the cartridge for easy cartridge replacement.

Flush XCLM+ and 7SI Cartridges by running water through filter for five (5) minutes at full flow in accordance with installation instructions.

This system must be installed and maintained according to the manufacturer's instructions, including installation and replacement of filter cartridges.

## OPERATION TIPS

Change cartridges on a regular six (6) month preventative maintenance program.

Change cartridges when capacity is reached or when pressure falls below 10 psi (0.7 bar).

Service flow rate must not exceed cartridge rating.

Always flush the filter cartridge at time of installation and cartridge change.

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.

## WARRANTY

Everpure water treatment systems by Pentair® (excluding replaceable elements) are covered by a limited warranty against defects in material and workmanship for a period of five years after date of purchase. Everpure replaceable elements (filter cartridges and water treatment cartridges) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. See printed warranty for details. Pentair will provide a copy of the warranty upon request.
